

# Jonathan Clark

Software Developer

Highly experienced professional with 12+ years background in Management and customer satisfaction. Proficient in using a wide variety of tools to provide efficient, cost effective solutions to boost productivity and overall organizational efficiency.

## Development Projects

### Contacts Management CLI

Command Line Interface written solely in Java for the purpose of managing a list of contacts and phone numbers. This project explores concepts of *Menu Driven List Manipulation* as well as using *File I/O* to manage data from sources existing outside of the program. What makes this project especially unique is its ability to validate user input to ensure a smooth, concise user experience.

### Weather Map Project

Single page web application that utilizes HTML, CSS, JQuery, and AJAX. This project accesses multiple open-source APIs to provide an in-depth weather forecast. Users can search and update a 5 Day Weather Forecast, in real time, based on either a searched location or a location set via pin-drop on an embedded map.

### Mobile Design Project

Single page application that focuses entirely on building a page that is fully responsive across multiple viewports. This web application hones in on complex styling and positioning concepts using Bootstrap, HTML, and CSS.

## Professional Experience

### Tycoon Flats - San Antonio, TX

FOH Manager, Bar Manager / Feb 2017 - Present
